

# Varn Multifount Plus

## Multi purpose fountain solution

Varn Multifount Plus is a versatile fountain concentrate, formulated for use with all inks (including UV and metallics) across a wide range of printing substrates.

Varn Multifount Plus has a stable buffer which is suitable for most water conditions, also providing excellent calcium control.

Varn Multifount Plus's characteristics reduce roller and blanket glaze due to troublesome calcium deposits, while producing a better ink lay for improved print quality.

Varn Multifount Plus contains no heavy transition ions which have been associated with taint and odour problems.

Varn Multifount Plus is economical in use, normally being used at 2-4% dosage.

Features	Advantages	Benefits	Product Benefits
Formulated for use with UV/conventional inks - all substrates.	Versatile production capabilities. No additional additives required.	Improved print quality. User friendly.	<ul style="list-style-type: none"> <li>• Formulated for use with UV/ conventional inks.</li> <li>• Excellent runability when using metallic inks.</li> <li>• Helps control troublesome calcium deposits.</li> <li>• Allows for the reduction of IPA.</li> <li>• Ideal for all printing applications specifically packaging/folding carton.</li> </ul>
Suitable for metallic inks.	Provides effective ink/water balance. Reduces damper feedback. Extends plate life before premature wear.	Cleaner running. Less downtime. Cost savings.	
Unique desensitiser & lubricant package.	Quick, clean start-up. Assists with ink piling problems.	Increased production. Less paper/board waste. Combats 'picking'.	
Calcium controlling.	Stable pH buffer system. Reduces calcium deposits.	Extends roller and blanket life. Less maintenance required.	

## Directions for use

For optimum economy and performance use in conjunction with Varn Graphic Arts Doser DI-150. Dosage between 2 and 4% depending on local water conditions.
