

# Varn Penetration Plus

## Advanced roller & blanket maintenance

Varn Penetration Plus cleans and restores rollers and blankets, and will improve print quality, and add life to blankets.

Varn Penetration Plus helps reduce glaze on blankets and rollers when used as a regular wash up solvent.

Varn Penetration Plus is water miscible, so also helps remove calcium and paper debris from both blankets and rollers.

Features	Advantages	Benefits	Product Benefits
Rejuvenates and deglazes all rubber compounds.	Optimise's working life of blankets and rollers.	Reduced press downtime. Reduced expense.	<ul style="list-style-type: none"> <li>• More cost effective than competitors products.</li> <li>• Helps to extend life of blankets and rollers.</li> <li>• Very quick to use.</li> <li>• Improved print quality by restoring 'nap' to blankets and rollers.</li> <li>• Do not use on unbaked plates.</li> <li>• Not suitable for use on EPDM rubber compounds.</li> </ul>
Restores original nap.	Optimise's ink transfer.	Improved, consistent print quality.	
Deep cleans rollers with one application.	Faster colour changes.	Increased production.	

## Directions for use

Blankets:

Use at the end of each shift to deep clean blankets after long runs.

Can be used instead of normal blanket washing, final wipe with water will totally revive blanket.

Rollers:

Manually use instead of your usual solvent to wash up the rollers.

Allow to run in for several minutes before applying blade, then finish off with water.

Varn Penetration Plus should be used as a weekly liquid maintenance for all blankets and rollers.

The improvements in print quality and ink transfer will be obvious from the first application.
